

8/10

InstantMessenger	FileRead, TCPPIInbound, TCPIPOutbound	Similar to FileLeftThroughNetworkPort. Combines all interleaving FileReads with the network events.  The application image name is one of those known to be used for instant Messenger.	Process
	P2PApp	May place constraints on the ports.  Constrain the application name to be one of those known to be a P2PApp.  Multiple ports will be used; some or all of them may have constraints. May constrain the protocol per app or per instance.  Similar to FileLeftThroughNetworkPort as concerns interleaved file reads.	Process
FTPFile	FileRead, TCPPIInbound, TCPIPOutbound	May want to split into two events, one for reading and one for writing.  Constrain to the common FTP port, unless the app is known by name to be an FTP client.	Process
RemoteAccess	TCPIPIInbound, TCPIPOutbound, UDPIInbound, UDPPOutbound, IPSECInbound, IPSECOutbound	Like FileLeftThroughNetworkPort, look for interleaved reads and network events, or interleaved writes and network events.	Process
